Calum Hrabi

Software Engineer

calum.hrabi@gmail.com | cmhrabi.github.io | cmhrabi | Calum Hrabi

Skills

Languages: Go, Python, JavaScript/TypeScript, C#
Frameworks: React, React Native, Express, Flask, Django, SQLc, Google ADK, .NET
Tools: Terraform, Docker, SQL, NoSQL, AWS, GCP, Firebase, GeoServer, PostGIS

Experience

Kablamo Canada Inc — *Jul 2025 - Present*
Software Engineer

- Developed wildfire risk modelling platform using **Next.js**, **Python**, **Temporal**, **PostGIS**, and **AWS**
- Built data ingestion engine to extract active wildfire information from government sources, lowering time to onboard new clients from **1 week** to **1 day**
- Optimized geospatial data processing and delivery through **GeoServer**, reducing memory utilization by **50%** and improving responsiveness of interactive map visualizations
- Designed event-sourced model to process **Kafka** transaction events for user display and audit logging

V2 Cloud Solutions — *Sep 2024 - Jan 2025*
Full-Stack Software Engineering Intern

- Developed and maintained features using **React**, **Python** and **Django** for SaaS cloud services dashboard
- Created data pipeline to **Metabase** to improve observability and user analytics with real-time insights

Kablamo Canada Inc — *May 2023 - May 2024*
Full-Stack Software Engineering Intern

- Developed full-stack features for fintech mobile application using **Go**, **AWS Lambda**, **React-Native**, and **TypeScript**
- Implemented **AWS Kinesis** Data Stream for real-time Lambda API log streaming to **Datadog**
- Created internal CLI tool using **Go** and **Cobra** to generate test coverage reports for 80+ repositories

Vluence — *Sep 2022 - May 2023*
Software Developer

- Implemented ETL pipeline using **Python**, **Pandas**, and **PostgreSQL** to extract and categorize SEC filing data

Environment and Climate Change Canada — *Jan 2022 - Apr 2022*
Software Engineering Intern

Projects

Golden Hour
- 7-day sun forecaster for Toronto patios using **Next.js**, **TypeScript**, **Supabase**, and **PostGIS**
- Modelled shadow casts on an interactive map ranking patios by predicted sun coverage

CompassLCCA
- Full-stack scientific tool comparing **lifetime cost and carbon impact** of decarbonisation options
- Built **Python** analysis engine with a **React/TypeScript** frontend and **PostgreSQL** datastore

Education

University of Waterloo — *Sep 2020 - Apr 2025*
B.A.Sc. in Management Engineering - Distinction

- Relevant Courses: Data Structures & Algorithms, Introduction to Functional Programming, Principles of Software Engineering, Applied Cryptography
